

HTML and CSS

Lab Session - 06

Marks (5)

- Open the file HTML_CSS.html.
 - Apply CSS to the file.
 - Use one example of the following:
 - Inline level CSS.
 - Documented Level CSS.
 - External CSS.
 - Simple Selector.
 - Class Selector.
 - Generic Selector.
 - In the HTML_CSS.html, add the following questions, Answer them and style them as well.
 - Which is better, Documented CSS or External CSS? Why?
 - Should we avoid inline CSS? Why?
 - Give an example of:
 - Universal Selector.
 - Attribute Selector.
 - Pseudo Classes.
- Note: create your own examples, do not use the ones in the slide.
- Note: No need for a whole page for the example, just the style and the element to apply it on.
