

Lab 6 Navigation Menu

Learning Outcome:

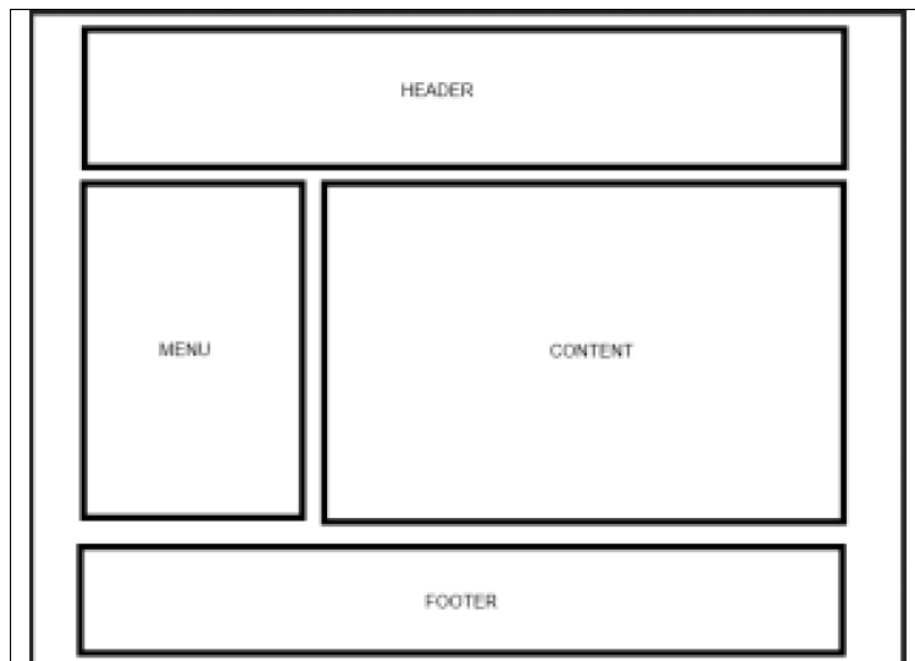

- Implement a Web Design Template (Header, Footer, and Menu) using CSS style
- Implement index.html containing the basic concept of CSS style
- Add Images and Video to a web page

Summary of Tasks

1. Common Look and Feel
2. Implement a Web Design Template using an EXTERNAL CSS file
3. Create index.html
6. View your webpage using a web browser
7. Submit Lab Link on LMS

Task 1

Before getting started with the following tasks review AlYamamah Website layout

You must implement the specified Design Template (About me ◇ Contact US ◇) on every page of your website.

Each page in your web site must have the following identical common elements: Header, Footer, and Menu.

- Header
 - o YU logo
- Menu
 - o Links to both AboutMe.html and ContactUS.html (we already did in previous labs)
- Footer
 - o Student Number, First Name, Last Name, Email Address

Task 2

Create a CSS file called **StyleSheet.css**

```
/* CSS property for header section */
```

```
.header {
```

```
background-color:white;
```

```
padding: 15px;
```

```
text-align:center;
```

```
}
```

```
/* CSS property for navigation menu */
```

```
.nav_menu {
```

```
overflow: hidden;
```

```
background-color:rgb(252, 139, 0) ;
```

```
}
```

```
.nav_menu a {
```

```
float: left;
```

```
font-family: Arial, Helvetica, sans-serif;
```

```
display: block;
```

```
color:white;
```

```
font-weight: bold;
```

```
text-align: center;
```

```
padding: 14px 16px;
```

```
text-decoration: none;
```

}
.nav_menu a:hover {
background-color: wheat;
color: orange;
}
.footer{
background-color:white;
padding: 15px;
text-align:center;
}

that will modify your site **index.html** in the following ways:

- Create an ID called 'header' Modify the header tag to match YU Website

```
<div class="header">
```

- Add YU logo

- Create an ID called 'navigation'

```
<div class="nav_menu">
```

- About me / Contact US

- Create an ID called 'footer'

```
<div class="footer">
```

- Student Name , ID, Email
